### **DETAILED ACTION**

The following action is in response to the amendment filed for application 10/538,983 on August 3, 2007.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Farah on August 21, 2007.

The application has been amended as follows:

In claim 1, on line 9, --the-- has been inserted before "transmission device."

The following changes to the drawings have been approved by the examiner and agreed upon by applicant:

In Fig. 1:

- part 6 (which is originally directed to the same part as part 16) should be pointing at the crowned tooth wheel (see red marking on drawing).

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

### ***Allowable Subject Matter***

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the variable-ratio transmission device as claimed, and particularly including means for axially sliding the first support, in order to change the reduction ratio of the transmission device; where rotation of the second hollow shaft causes the first support to perform an orbital movement, thereby causing the teeth or rollers on the first support to engage the teeth on the wheel, and including the remaining structure of claim 1. The present invention also particularly includes means for axially sliding the first support or the wheel with respect to the support shaft; where rotation of the second hollow shaft causes the first support to perform an orbital movement, thereby causing the teeth or rollers on the first support to engage the teeth on the wheel, and including the remaining structure of claim 5

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Coronel has been cited to show a similar transmission.
